PROFESSIONAL SUMMARY

I'm Nicolas Suzuki, a software developer since 2020, working on web applications, education products and corporate systems. I focus on frontend engineering with Next.js, micro-frontends and Design Systems.

I combine AI's capacity for exploration with my technical responsibility for decisions and delivery.

SKILLS

Core focus: React, Next.js, TypeScript, micro-frontends and Design Systems.

Supporting experience: REST and GraphQL APIs, Storybook, Node.js, Docker, CI/CD, AWS and Google Cloud.

SELECTED EXPERIENCE

Sevenred | Mid-level Frontend Developer | 2025 - present

Work on a corporate project with React and TypeScript, micro-frontend architecture, Design Systems, performance and accessibility.

Pixel Breeders | Software Developer | 2023 - 2025

Web and mobile applications, components documented in Storybook, code reviews, mentoring and collaboration with designers.

Magroove | Junior Developer | 2023

React frontend, API integrations, Docker and contribution to a project using Flask and Elasticsearch.

Necto Systems | Software Development | 2022 - 2023

React, Vue.js, GraphQL, Figma prototyping, sprint planning and communication with clients.

Kuadro | IT Intern / Junior Developer | 2020 - 2022

Foundations in Linux, Git, JavaScript and React. Node.js development and modernizing applications with TypeScript.

SELECTED PROJECTS

Skills Lab - freelance · education: MVP planning, frontend and API integration. Evolving MVP.

Education platform - corporate experience · education: Frontend, integrations and interface states. Professional experience.

Awaken - personal project · fitness: Frontend and infrastructure, collaborating with my brother. In development.

EDUCATION AND LANGUAGES

Science and Technology · UNIFESP | Technical degree in Mechatronics · ETEP

I also taught programming logic to children as a volunteer teacher at Decolar.
